DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent Publication 07-294706, translation.

The publication teaches a method for forming an antireflection film for optical articles, said method comprising dipping the article in a fluororesin solution and forming a coating on the article, per claims 1 and 7-8. In addition, the publication teaches that the coating can be even or uneven as required by claims 9 and 10. See abstract and page 6. Therefore, the teachings in the publication would have rendered obvious the invention as claimed in present claims 1 and 7-10.

Allowable Subject Matter

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
